New Stainless Steel Adaptors for *SilverLine TuffGrip Test Cables* Available From Times Microwave Systems!

Times Microwave Systems has added precision, high quality stainless steel adaptors to complement our ***SilverLine TuffGrip Test Cables***. These new ***TuffGrip*** adaptors are much more durable than typical nickel-plated brass adaptors.

TuffGrip adaptors are competitively priced but made in the USA from high quality stainless steel. The Type N male and female bullet adaptors provide excellent performance to 18 GHz with exceptionally low VSWR. The 7-16 DIN adaptors are laboratory grade but designed to be rugged enough to provide long life in field applications. The coupling action on these large connectors is smooth and easy.

These precision adaptors are available in the following interface configurations:

7-16 DIN female to 7-16 DIN female

N male to N male

N female to N female

N male to 7-16 DIN female

N male to 7-16 DIN male

SilverLine TuffGrip Test Cables are rugged, phase stable test cables for field RF test and measurement.

About Times Microwave Systems

Times Microwave Systems has more than 50 years experience designing innovative, high-reliability, coaxial cables and assemblies for demanding interconnection applications. An engineering oriented organization, the company specializes in the design and manufacture of high performance flexible and semi-rigid coaxial cable, connectors, and cable assemblies for RF transmission from HF through microwave frequencies.
