

INTRODUCTION

Times Microwave Systems designs and manufactures high performance coaxial cables, connectors and cable assemblies for a broad range of RF transmission applications. For more than 50 years, Times has been the leader in the development of new cable technologies to meet the demands of evolving RF and microwave applications. This technological manufacturing and application leadership continues today.

Since its inception, Times has been dedicated to the improvement of coaxial cable technology and the development of new and innovative cable products to address the increasingly rigorous demands placed on RF transmission products.

The expertise that provided cable solutions for the demanding requirements of airborne electronic systems and led the way in the development of low smoke cables for shipboard applications is now yielding high performance cables to meet the needs of the wireless communications market with Times LMR low loss flexible coax cables.

Times has been instrumental in the development of commercial and military specifications, including MIL-C-17 for coaxial cables. Times is the leading source of MIL-C-17 qualified products, holding more QPL's (Qualified Product Listings) than any other manufacturer in the world

Times applies its expertise to customer requirements through a staff of Field Application Engineers. Unlike other cable manufacturers with limited product lines who try to fit customer applications to their existing products, the philosophy of Times is to select or design the right product for each application.

This catalog serves as a guide to many of the products offered by Times and is a comprehensive technical reference with useful technical information on MIL-C-17 and RG cables.
