Introducing the NEW Clarity™ Series 40 GHz Test Cables!

When Everything is Important...
The NEW *Clarity™ Series* is the *Clear Choice*

Times Microwave introduces its new Clarity™ Series of 18, 26.5 and 40 GHz coax test cables. Clarity™ boasts steel torque, crush and overbend protection with abrasion resistance – while not compromising flexibility. The cable is ultra-stable through 40 GHz with exceptionally low attenuation. The design includes an ergonomic, injection molded strain relief and Times' new, SureGrip™ coupling nut to significantly improve the user's everyday experience. Clarity™ is appropriate for use as VNA test port extension, R&D lab, production test or system interconnect cables.

About Times Microwave Systems

Times Microwave Systems has over 65 years experience in designing innovative, high-reliability, coaxial cables and assemblies for demanding interconnection problems. An engineering oriented organization, the company specializes in the design and manufacture of high performance flexible and semi-rigid coaxial cable, connectors, and cable assemblies for RF transmission from HF through microwave frequencies as well as lightning and surge protection products.
