Times Microwave Systems Expands its Offering with the New High Power (100-700MHz) LP-HBX-N Series of Lightning and Surge Protection Products for RF Communication Networks

The Times-Protect **LP-HBX-N** high performance lightning protector series provides exceptional protection over the 100-700 MHz frequency band addressing high power (up to 750W) single or multi channel applications. The DC blocked design provides superior surge protection while maintaining outstanding return loss and insertion loss performance. In addition to its excellent power handling capability, the **LP-HBX-N** series is capable of withstanding multiple strikes. The white bronze plated construction of the **LP-HBX-N** series eliminates potential galvanic corrosion issues and provides long life in hostile environments and the fully weatherized housing is sealed to IP65 standards allowing for outdoor installation. The Times-Protect **LP-HBX-N** high performance lightning protector series comes with an industry leading 10 year warranty and Times will also replace it free of charge during the warranty period if it is damaged or destroyed in a lightning strike while protecting the RF equipment.

Times-Protect LP-HBX-N surge arrestors available are:

LP-HBX-NFF (N female on surge and protected sides)	\$90.00 list price
LP-HBX-NMP (N male on protected side & N female on surge side)	\$90.00 list price
LP-HBX-NMS (N male on surge side & N female on protected side)	\$90.00 list price

About Times Microwave Systems

Times Microwave Systems has over 60 years experience in designing innovative, high-reliability, coaxial cables and assemblies for demanding interconnection problems. An engineering oriented organization, the company specializes in the design and manufacture of high performance flexible and semi-rigid coaxial cable, connectors, and cable assemblies for RF transmission from HF through microwave frequencies as well as surge arrestors for the protection of RF equipment.
