Times Microwave Systems announces its LP-GTR series of Lightning Protection Products for RF Communication Networks

The **LP-GTR** series is the newest addition to the *Times-Protect*[™] line of innovative RF lightning and surge protection products. The **LP-GTR** series is designed to pass DC for applications requiring power to be supplied to the electronics. The outstanding RF performance **LP-GTR** series combined with its ability to handle high surge currents makes it the perfect protection solution for distributed antenna systems, tower mounted amplifiers and GPS systems. The IP67 rated weatherized housing design makes the **LP-STR** product family suitable for outdoor as well as indoor installations and its rugged construction enables the units to withstand the harshest installation environments. The N connector designs cover the entire frequency spectrum from DC through 3000MHz while the 716 DIN types can be used from DC through 2500MHz. Among the many features of the new **LP-GTR** series of RF lightning protection products are:

- DC pass, multi-strike capability
- Replaceable gas tube design
- Broadband bidirectional performance
- Excellent IL/RL performance over the entire operating frequency band
- Weatherized housing to IP67 standard

About Times Microwave Systems

Times Microwave Systems has over 60 years experience in designing innovative, high-reliability, coaxial cables and assemblies for demanding interconnection problems. An engineering oriented organization, the company specializes in the design and manufacture of high performance flexible and semi-rigid coaxial cable, connectors, and cable assemblies for RF transmission from HF through microwave frequencies as well as surge arrestors for the protection of RF equipment.
