## **Times Microwave Systems announces its LP-STR series of Lightning Protection Products for RF Communication Networks**

Times Microwave Systems new **LP-STR** series is part of its **Times-Protect™** line of innovative RF lightning and surge protection products. The **LP-STR** series is an exceptional DC blocked design with outstanding surge performance. The operating bandwidth of 800MHz-2500MHz makes the **LP-STR** series suitable for a broad range of applications. With its excellent PIM performance, outstanding S parameters over the entire operating band and superior surge performance, the **LP-STR** product family is unequalled. Its fully weatherized construction meeting IP67 standard allows for outdoor as well as indoor installation. The **LP-STR** series has high power handling capability and will withstand multiple strikes. Both DIN and N connector types are available. Among the main features of the new **LP-STR** series of RF lightning protection products are:

- Excellent passive intermodulation (PIM) performance
- Outstanding IL/RL characteristics
- DC blocked for superior surge performance
- High surge current rating
- Broadband multi-strike design
- High power rating over the entire frequency band
- Fully weatherized housing to IP67 standard

### **About Times Microwave Systems**

Times Microwave Systems has over 60 years experience in designing innovative, high-reliability, coaxial cables and assemblies for demanding interconnection problems. An engineering oriented organization, the company specializes in the design and manufacture of high performance flexible and semi-rigid coaxial cable, connectors, and cable assemblies for RF transmission from HF through microwave frequencies as well as surge arrestors for the protection of RF equipment.
