

SOLUTION TIMES

Customized Bundle Solutions for Medical Applications

Next-generation medical systems require multiple transmission mediums to be bundled into interconnect solutions that can meet higher performance requirements. Some applications require single-use solutions that are disposed of after each treatment, and others demand long-term durability for use in permanent installation of a medical system. Times Microwave Systems designs, optimizes, and manufactures each bundled solution to address critical requirements such as:

- High power handling
- Small signal
- Low voltage
- Thermal management
- Cable management
- Flexibility
- Biocompatibility
- Aesthetics

We are your custom design partners for end-to-end bundled assemblies when you need to integrate.
