New RodentRepel® LMR® Cables from Times Microwave Systems

Times Microwave Systems has introduced a new series of **LMR®** cable products which are resistant to rodent damage. The RodentRepel® cable jacket contains a proprietary non-hazardous, non-toxic additive that discourages rodents and other animals from chewing the cable. The additive is environmentally safe and not harmful to humans, birds or animals. The repellent exhibits a scent that animals readily associate with predators and interpret as a danger signal but that is imperceptible to people. Times RodentRepel® coaxial cables also include the **LMR®** watertight “DB” feature for excellent resistance to water ingress and are compatible with all Times connectors, tools and accessories.

<u>Part Number</u>	<u>Stock Code</u>	<u>List Price</u>	<u>Description</u>
LMR-400-RR-DB	11903	\$1.95/ft	LMR-400 watertight, RodentRepel, Black PE jacket
LMR-900-RR-DB	11904	\$8.50/ft	LMR-900 watertight, RodentRepel, Black PE jacket

RodentRepel® is a registered trademark of Amphenol TFC

About Times Microwave Systems

Times Microwave Systems has over 70 years of experience in designing innovative, high-reliability, coaxial cables and assemblies for demanding interconnection problems. An engineering oriented organization, the company specializes in the design and manufacture of high performance flexible and semi-rigid coaxial cable, connectors, and cable assemblies for RF transmission from HF through microwave frequencies as well as lightning and surge protection products.
