

PhaseTrack®- PFlex

AS 9100 Registered

Phase Stable Cable Assemblies

- All Phase Sensitive Systems
- Phase Optimized Flexible Alternative to Semi-Rigid
- All System Platforms
(Ground, Sea, Airborn, Space)

PhaseTrack PFlex® cable assemblies are designed for applications demanding minimal phase change over temperature. PFlex® cable assemblies are a flexible interconnect-style cable often used as a semi-rigid replacement. PFlex® cables use proprietary TF4™ dielectric that does not have the abrupt shift in phase that occurs with solid or tape wrapped PTFE based products under normal room ambient conditions. PFlex® cable uses the same shield construction as Times popular TFlex® cables.

Features:

- Superior Stability (vs LD PTFE)
- PTFE “Knee” is Nonexistent
- TF4™ Dielectric Technology
