New & Improved Plenum Rated *LMR-LLPX* Cables from Times Microwave Systems

Effective immediately, Times Microwave Systems introduces an improved series of plenum cables, ***LMR-LLPX*** to replace the LMR-LLPL series. The new plenum rated LMR-LLPX series cables have a red fluoropolymer jacket and will provide the same attenuation as the orange PVC jacketed LMR-LLPL cables. The ***LMR-LLPX*** series cables accept all standard Times Microwave plenum connectors and can be prepped with the easy to use CST strip tools. The ***LMR-LLPX*** series is offered in sizes 195 to 1200.

No new orders will be taken for the LMR-LLPL series cables. All open orders for LMR-LLPL cables will be completed and shipped as originally ordered.

The red jacket of the ***LMR-LLPX*** series addresses the requirement for a red jacketed cable for the public safety and in-building applications. The new fluoropolymer jacket offers many added features and benefits including:

- Extended temperature range (-40C to 125 C)
- Higher power handling
- Higher Oxygen Index jacket for improved plenum flame and smoke performance
- Lower coefficient of friction for easier installations
- Better cut-through and abrasion resistance
- Advanced chemical resistance and overall UV resistance

All ***LMR-LLPX*** cables are marked with the required UL printing legend (Type CMP, UL File E-170516) the same as the LMR-LLPL series. Pricing for the ***LMR-LLPX*** series is the same as for the LMR-LLPL series.

About Times Microwave Systems

Times Microwave Systems has over 70 years of experience in designing innovative, high-reliability, coaxial cables and assemblies for demanding interconnection problems. An engineering oriented organization, the company specializes in the design and manufacture of high performance flexible and semi-rigid coaxial cable, connectors, and cable assemblies for RF transmission from HF through microwave frequencies as well as lightning and surge protection products.
