

What's New?

M8M

The **M8M™** interconnection system is an addition to our time-tested high-performance M8 family of multiport interconnects. Works up to 40 GHz to meet the needs of high-frequency applications and is compatible with all of our M8 multiport shells to maximize existing infrastructure.

Test & Measurement

Our new and improved [Test & Measurement brochure](#) includes the new Clarity™ family of test cables, in addition to our proven SilverLine®, Extra Flex™, TuffGrip® and LPA™ products for test and measurement applications.

InstaBend™

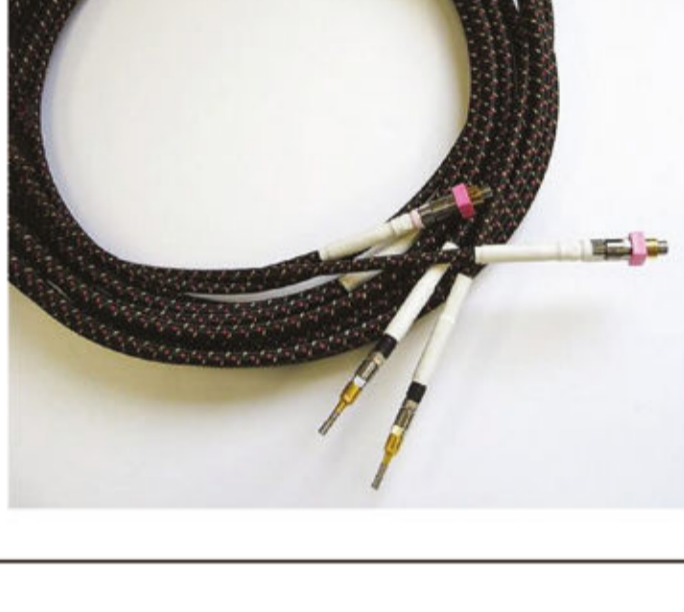

We have made some improvements and updates to our popular and trusted InstaBend™086 product line! To keep you up to date with the most current and accurate information, please find our latest InstaBend [datasheet](#) here.

Featured Article

[RF Technology Helps Connect Avionics Systems](#)

Avionics systems provide electronic guidance, navigation, and communications through harsh and hostile environments for a wide range of airframes. These operating environments include exposure to elevated levels of shock and vibration; vacuum-like conditions of high altitudes; corrosive effects of hydraulic fluids, fuels, and other chemicals; and wide temperature ranges.
