

**Collaboration is Key!** 

**Wallingford, CT** - On May 17, Mayor Dickinson of Wallingford came to visit Times Microwave Systems. During his tour of the plant, he asked a lot of great questions, and was fascinated by our braiders. Afterwards, we had a good discussion around how we can get more involved in the Wallingford community. As recognition for Times' ongoing commitment to the town of Wallingford, Mayor Dickinson and the Wallingford Economic Development Committee presented Times with a Certificate of Appreciation. By supporting our local community here in Wallingford, we can better support our customers across the globe.

**What's NEW?!**

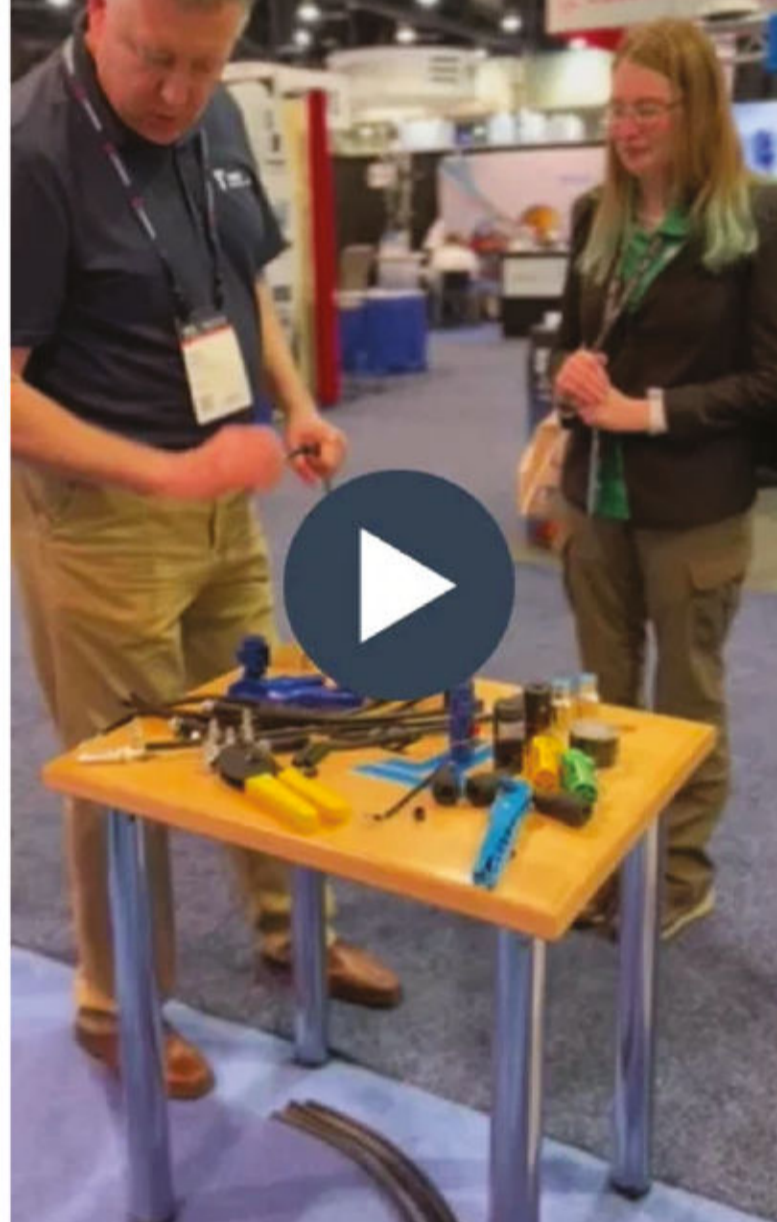

The Clarity™ 110-SR is the newest addition to the [Clarity Series](#), known for its industry-leading performance and unparalleled value. The Clarity 110-SR performs comparably to the ultra-flexible Clarity™ 110 introduced in 2021, but the new SR version is a semi-rigid cable that accommodates tricky routing in tight spaces.

**Times in the Field**

Kevin Moyher, Senior Product Manager, demonstrates a booth attendee at the IWCE Expo, how easy it is to terminate one of our LMR cables.

Our engineers love to educate and demonstrate the ease and reliability of our products, be sure to stop by our booth to see for yourself. Upcoming tradeshow are listed below!

**You Ask, We Answer!**

**Q:** How can companies adapt and deal with the ongoing supply chain issue while still meeting their customers needs?

**A:** To keep your projects on track, make sure you're working with suppliers that are as agile as you need to be: you may have to change suppliers or reconfigure system designs to get the job done on time. From now on, consider your supply chain as a critical part of your business. Meanwhile, be willing to implement new strategies to mitigate impact in the short term.
