

Solution Times: Hybrid Cable Assemblies

Fiber optic and coaxial cable combine into hybrid assemblies for operation of complex, compact, and multifunctional systems. Hybrid assemblies bundle together coaxial cables, optical fiber, shielded/unshielded wires, and fluid lines.

Times Microwave Systems Expands European Operations

Times Microwave Systems is expanding its Netherlands master distribution hub by 50 percent to manage growing demand for its products and services in Europe. The expansion will add 600m² (6,458 ft²) to its current 1,200m² (12,916 ft²) warehouse in Houten, Netherlands, to support increasing volume of shipments moving through the facility. The additional space will allow Times Microwave Systems' Netherlands operation to establish new cross-docking processes and consolidate shipments, optimizing efficiency, and reducing freight costs to support continued business growth in the region. Product Spotlight

Low PIM Assemblies

The **SPO™** low-loss, low PIM corrugated copper cable is a workhorse in terms of low PIM interconnects. The fire-retardant version, **SPF™**, is a UL listed, type CMR (riser). The durable fire retardant, low smoke polyolefin outer jacket is also suitable for outdoor use. Finally, the **SPP™** is for plenum requirements within a building. This is a UL listed, type CMP (plenum) that meets the standard tunnel test. All three products are available in 250, 375, and 500 sizes in any required connector configuration and length.
