

Success in Space!

DART Mission Impacted an Asteroid

On Monday, NASA's DART Mission successfully collided with the asteroid Dimorphos! This was a test to alter the asteroid's speed and path around the larger asteroid Didymos to see if a similar technique can be used to divert dangerous asteroids in the future.

A crucial part of this mission was the LICIACube, which was packed inside the DART spacecraft until September 11 when it separated in anticipation of the collision.

Our Products on LICIACube - PT047

Our PT047 was a part of LICIACube for this historic mission! LICIACube is a compact imaging satellite designed to survive the crash and send back the footage of the DART collision. It allowed for the impact to be livestreamed on Earth and will continue flying through space for the next several months.

Bangalore Space Expo 2022

Thank you to everyone who came out to the Space Expo India show this week!

Our team, lead by Rajesh Navaneethan, met with ISRO's New Chairman Dr. S. Somnath to discuss the new and exciting projects Times Microwave Systems is creating.

Check out our latest videos!

In this episode of Reel Times, Julianne Benson, one of our Manufacturing Engineers, sits down with Carrie to have an important and great discussion about women in engineering, her role within the organization, and more.
