

Defense Production Is Accelerating. Can Your RF Interconnect Supplier Keep Up?

The defense market is under a level of pressure not seen since the 1940s. Programs across missiles, unmanned aerial vehicles, and next-generation aircraft are accelerating at rapid rates. Program managers are beginning to question

whether their approved suppliers have the capacity, infrastructure, and the organizational readiness to scale with their needs. Too often the answer is no. Suppliers that can answer yes have invested in these improvements for years.

At Times Microwave Systems, we've spent decades building the resilience needed to support defense programs. Our capacity strategy carefully considers speed, readiness, and risk reduction. With over 200,000 square feet across three

U.S. facilities and continued updates to our equipment, we can increase our production capabilities. Every month we produce 16,000 assemblies in North America and ship up to 5 million feet of cable globally. Our in-house engineering, extensive product portfolio, and existing qualification data enable us to provide faster design-ins, streamlined qualification by similarity, and reduced program risk.

The ramp is already underway. We've prepared for this environment. Is your current supplier keeping up?

MICROWAVE SYSTEMS
AN AMPHENOL COMPANY

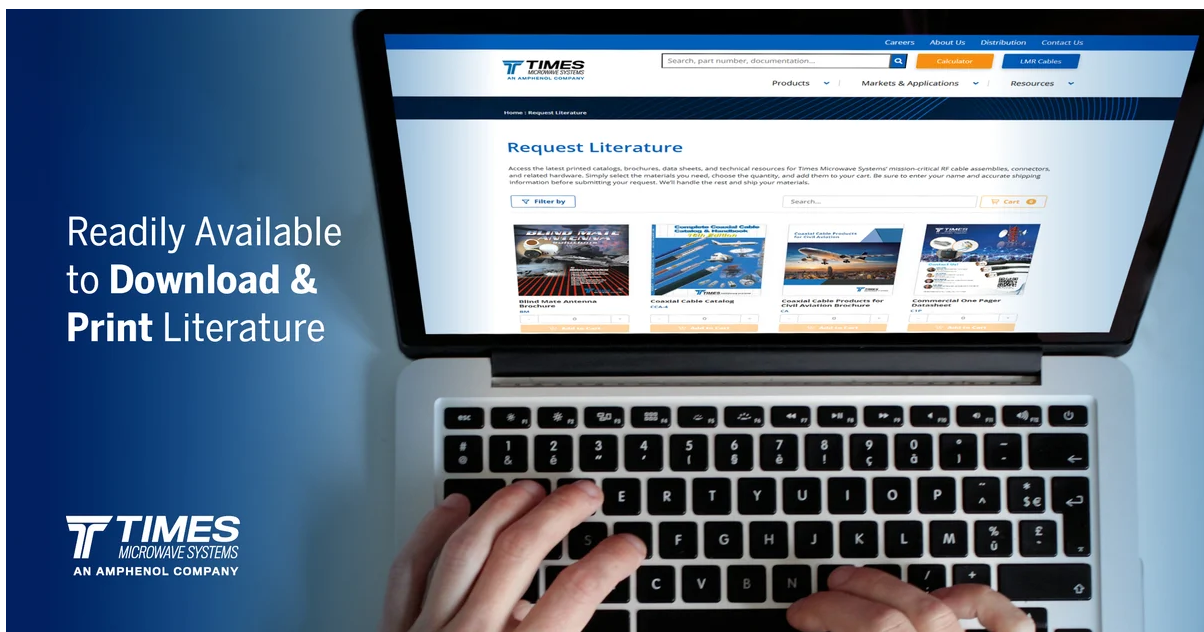

Visit us at booth **#1003**

Made in the USA

The banner features a dark background with a blue-tinted image of a radio tower on the left. On the right, there is a circular collage of various microwave connectors and cables. A blue circular badge with a white border and the text 'Made in the USA' is overlaid on the collage. The Times Microwave Systems logo is in the bottom left corner, and the booth number is in the bottom center.

Get the Literature You Need Delivered to Your Door

Looking for the latest product information? Visit our Literature Portal to access brochures, datasheets, and catalogs, all in one place. Simply select what you need under Resources → Request Literature on our website, and we'll print and ship it directly to you.
